DCS Downhole Chemical Solutions | 360°

Your Job. Your Data. At Your Fingertips.

> You shouldn't have to call to know what's happening on your job. DCS360 gives you complete visibility into your DCS chemistry 24/7, from any device.

01 | Why DCS360

DCS360 and the Value it Provides

Your Job, Fully in View.

DCS360 gives you real-time visibility into your DriFlow operations, from live stage performance and chemical usage to delivery status and job documents. Everything you need to stay informed and make better decisions, all in one place.

DCS360 pairs the live view with your job history. Compare stages, review trends, and establish a practical baseline from work on your account — so the next plan starts with evidence, not recollection.

Live Chemical Inventory & Consumption

Monitor in real time how the DCS inventory & logistics team is ensuring you never run out of product — updated every 20 seconds.

Current job & Historical Chemical Analysis

Access to current job and historical chemical analysis. Review, track, and compare chemical performance across jobs for better visibility & decision-making.

Real-time Data & Analytics

Track per-stage usage, treating pressure, and estimated invoicing in one place. Request a stage ticket and access the information you need. No emails, no waiting.

Delivery Tracking & Scheduling

See upcoming deliveries on a live calendar, updated the moment a driver is assigned. Full supply chain visibility, without a single call.

SDS, BOL & Document Center

Easy access to current BOLs and SDSs, with one-click exporting. Work from the latest document versions without the hassle of tracking down email attachments.

Direct ROC Contact

One tap connects you to a live DCS Remote Operations Center technician — 24 hours a day, 7 days a week. No IVR, no voicemail.

02 | Service Lines Supported

How DCS360 Brings Operational Data Together

Across every service line, DCS360 brings your operations together in one centralized platform, giving you access to the data, insights, and tools needed to manage your fluid programs more efficiently.

Whether you're running a DriFlow job, tracking liquid chemical consumption, or utilizing TruFlow technology, the platform provides the visibility and information needed to plan, monitor, and optimize performance in one place.

DriFlow™ Powered by DCS

DriFlow Jobs

Complete view into your DriFlow dry FR program

- Historical and post job analytics
- Live data streaming
- Future job planning

LIQUID-ONLY

Liquid Only Jobs

Don't have a DriFlow unit? No problem, view all your consumption data here.

TRUFLOW™ Powered by DCS

TruFlow

Premium one-stop-shop fluid optimization equipment & software package.
