

Job Posting – Electronics Technician

Tentative Start Date – June 2022

Downhole Chemical Solutions, LLC

Summary

Downhole Chemical Solutions (DCS) is seeking multiple Electronics Technicians in both Midland, TX and Marshall, TX to provide technical support for DCS's field operations, and to assist in the growth of their dry friction reducer delivery program (DriFlow™). The ideal candidate will be highly self-motivated, and eager to grow.

Location & Start Date

- **Midland, TX or Marshall, TX**
- Tentative Start Date June 2022

Requirements

- Strong troubleshooting skills, and ability to work under pressure in oilfield environments
- Ability to use a multimeter with proficiency
- Willingness to relocate to Midland, TX or Marshall, TX and travel as needed throughout the U.S. to support DCS's operations
- Must be self-motivated, and able to work autonomously alongside field personnel and engineers
- Ability to work in a fast-paced, dynamic work environment

Experience

- 1-2 years in an electronics related field OR a 2-year degree in a related field from a technical college

Desired Skills

- Strong communication skills
- Computer literacy
- Working understanding of completions operations, specifically completion chemicals

Benefits

- Competitive salary
- 100% employer-paid Medical, Dental, Vision insurance premiums
- Company truck

Company Culture

- Fast-paced, team-oriented work environment
- Strong emphasis on innovation in both technology and operations
- Highly autonomous work schedule
